## PREFACE

25X1

25X1

This report supplements [redacted] Yedrovo ICBM Complex, USSR, 1/ prepared in response to CIA Requirement C-DI5-82,972 requesting detailed line drawings, to scale, of elements of the complex. The information contained herein is based on [redacted] photography through [redacted]. Individual reports will be updated periodically to reflect changes observed on subsequent photography.

25X1

The precision target plot included in this report is a mathematically rectified projection of the area. Plots are compiled by utilizing precision mensuration instruments, and image interpretation is performed with the aid of stereoscopic viewing equipment. Identifiable image points are measured and their coordinate values mathematically transformed by computer. This transformation corrects for camera and attitude (pitch, roll, and yaw) induced distortions but does not correct for displacement due to ground relief and object height.

This target plot represents the most accurate data compiled to date, but the user is cautioned to exercise care in scaling distances or determining azimuths from this plot, inasmuch as relief can introduce errors in scaling distance and alignment. The dimensions given are accurate to within plus or minus 5 feet or 5 percent, whichever is greater.
